

Global Education Network Society's

The second day was on the books related to General Management. The library having a vast collection of General Management were display and the users of the library were extremely a happy to see the vast collections

DR.RAMAKANT KULKARNI DURING THE BOOK DISPLAY

STUDENTS DURING THE WORLD BOOK DAY

The Third and the concluding day was on fictions and it was also able to pull lots of attention of students and faculties.

Objective

The main objective of holding a book display is to make students friendlier about books, which is always not possible by only seeing the jacket of the book or reading book reviews.

To create awareness and to establish the habit of reading in its students.

Conclusion: All though library follows an open access system , the users still ignore the books kept in the racks and never takes pain to reach through the books and when such book display is organized suddenly you find that the users are taken aback to see such rich collection of books.

Surprising when the book display was arranged the reservation of books went on a high speed and appreciation and realizing that library had some wonderful collection was realized. The event was successful as the users showed overwhelming response.

During the period of one year GBS library has given its best to attract the users through conducting many programs and more over it has used the GBS FOCUS newsletter to attract the user's community and had been a part of appreciation from the Faculty and students, we heartily congratulate the Library Team for carrying out an excellent Show.
